

CLAIMS

1. A board system comprising:

at least one board panel having a body encased by a trim having an interior edge and an exterior edge opposite said interior edge, said at least one board panel including at least one locking mechanism disposed on said trim and configured to attach to another board panel, at least one fin coupled to said interior edge, and at least one fixture coupled to said exterior edge; and

a base station configured to receive said at least one board panel, said base station having a first cross member coupled to a first support member and a second support member, and a second cross member coupled to said first support member and said second support member, said second cross member having at least one arm, said second cross member rotatably attaches to said first support member and said second support member.

2. The board system of Claim 1, wherein said at least one locking mechanism is a magnet.

3. The board system of Claim 1, wherein said at least one locking mechanism is disposed in at least one corner of said at least one board panel.

4. The board system of Claim 1, wherein said at least one fin is configured to hold items against said at least one board panel.

5. The board system of Claim 4, wherein said items are selected from a group consisting of papers, laminated papers, calendars, posters, presentations, placards, signage, wall planners, and pictures.

6. The board system of Claim 1, further comprising:
a handle disposed on said exterior edge of said trim.

7. The board system of Claim 1, further comprising:
an accessory tray disposed on said at least one arm of said base station.

8. The board system of Claim 1, wherein said second cross member has a spring loaded button locking mechanism for rotatable attachment to said first support member and said second support member.

9. The board system of Claim 1, further comprising:
a mounting block disposed on said exterior edge of said trim.

10. The board system of Claim 1, wherein said base station comprises a material selected from a group consisting of plastic, metal, and wood.

11. The board system of Claim 1, wherein said body is a panel selected from a group consisting of white board panels, chalkboard panels, cork board panels, and magnetic board panels.

12. The board system of Claim 1, wherein said trim comprises a material selected from a group consisting of plastic, metal, and wood.

13. A board panel comprising:
a body;
a trim encasing said body, said trim having an interior edge and an exterior edge opposite said interior edge; and
at least one fin coupled to said interior edge.

14. The board panel of Claim 13, wherein said at least one fin is configured to hold items against said board panel.

15. The board panel of Claim 14, wherein said items are selected from a group consisting of papers, laminated papers, calendars, posters, presentations, placards, signage, wall planners, and pictures.

16. The board panel of Claim 13, further comprising:
at least one locking mechanism disposed on said trim.

17. The board panel of Claim 13, further comprising:
a handle disposed on said exterior edge of said trim.

18. The board panel of Claim 13, further comprising:
a mounting block disposed on said exterior edge.

19. The board panel of Claim 13, wherein said body is a panel selected from a group consisting of white board panels, chalkboard panels, cork board panels, and magnetic board panels.

20. The board panel of Claim 13, wherein said trim comprises a material selected from a group consisting of plastic, metal, and wood.

21. A base station for holding board panels comprising:
- a first cross member coupled to a first support member and a second support member; and
- a second cross member coupled to said first support member and said second support member, said second cross member having at least one arm;
- wherein said second cross member rotatably attaches to said first support member and said second support member.
22. The base station of Claim 21, wherein the base station comprises a material selected from a group consisting of plastic, metal, and wood.
23. The base station of Claim 21, wherein the base station is configured to receive at least one board panel.
24. The base station of Claim 21, wherein said second cross member has a spring loaded button locking mechanism for rotatable attachment to said first support member and said second support member.
25. The base station of Claim 21, further comprising:
- an accessory tray disposed on said at least one arm of said base station.

26. The base station of Claim 21, wherein said first cross member is adjustable.

27. The base station of Claim 21, further comprising:
a means for mounting the base station.
